

Decorative Cover

INSTALLATION INSTRUCTIONS

- **Inspect crate** for shipping damage. Report any damage to shipper *immediately*.
- **Unpack Decorative Cover** carefully to protect the fabric and frame, etc. SVS recommends that the *original* shipping crate and packing be kept through the 60 day warranty period.

Note: All repairs, warranted or otherwise, are required to be done at the SVS factory.

- **Install the Decorative Cover**, as Drawing #1 illustrates. Make sure that the Decorative Cover frame is centered around the lift and within the ceiling hole opening, assuring clearance within all sides of the ceiling opening – run the lift slowly to verify.
- The Decorative Cover must rest *on* the ceiling closure at all times, except for a limited time when the service position is used.

Important Note: *Do not attach the Decorative Cover to the ceiling closure – damage will occur.*
